REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claims are allowable over the cited prior arts because said prior arts do not disclose or make obvious a fiber product treated by use of a composition comprising a water-soluble, flame-retardant polyester resin composition comprising components as claimed. Horie 6,498,227 discloses a flame retardant, fiber-treatment, and method for imparting flame retardancy, and flame resistant polyester textile materials such as fibers. The flame retardant is a polyester obtained from an aromatic dicarboxylic acid having no anionic group other than the carboxylic groups; a diol; and phosphinic acid derivative. There is no use of a water-solubility imparting compound. Sano et al 5,614,573 discloses flame retardants and finishing method for polyester-based fiber materials. The flame retardant material comprises a phosphoryl compound. The retardant is structurally different from the claims herein. Posey et al 4,476,189 discloses a copolyester primed polyester film. The primer composition is a polyester comprising TPA; an aliphatic dicarboxylic acid; a sulfomonomer; and a glycol. A phosphorous acid is added as a stabilizer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
